210301504 PRACTICAL ON PHP

Practice Assignment – 2

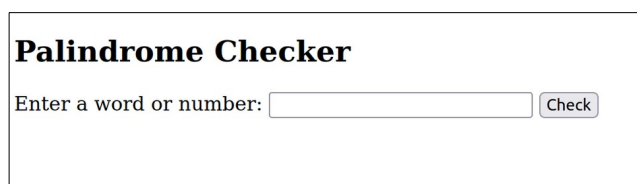

- 1 Check if a number is positive or negative. Generate random number in textbox.
- 2 Create simple login form.

- 3 Create a form where a student enters marks for 3 subjects. After submission, PHP calculates the total, percentage, and result (Pass/Fail).

- 4 Write php and html program to find entered data is palindrome or not.

5

Online Food Order Form : User selects a meal type from a dropdown and can optionally check if they want **extra toppings**. The form displays the final selection with additional cost if toppings are selected.

Place Your Order

Select a Meal: Pizza - INR200 ▼
