210301504 PRACTICAL ON PHP

Practice Assignment – 1

- 1 Write a PHP program to display your name, age, and course using echo.
- 2 Write a program to add two numbers and display the result.
- 3 Write a PHP script that swaps the values of two variables.
- 4 Create form for following using form and table tag. (call same page)

Enter the First Number:	<input type="text" value="40"/>
Enter the Second Number:	<input type="text" value="50"/>
<input type="button" value="Add"/>	
Sum =	<input type="text" value="90"/>

- 5 Create form for following using form and table tag. Pass all data in other form.

School ID Registration Form	
<hr/>	
Name	
<input type="text"/>	<input type="text"/>
First	Last
Expected Year of Graduation	
<input type="text"/>	
Address	
<input type="text"/>	
Street Address	
<input type="text"/>	
Address Line 2	

6 Create a modular PHP-based webpage using the following:

- A **header** file that displays the site title using a variable `$siteName`.
- A **main content** section in the `index.php` file with a welcome message.
- A **footer** file showing a copyright.
- Use `require` to include a **config file** (where `$siteName` is defined).
- Use `include` to insert the header and footer into the main page

`index.php`
